SUMMARY

Experienced in using engineering software such as AutoCAD, Revit, Navisworks and other technical tools. Seeking a job opportunity to enhance my professional knowledge and practical skills, gain hands-on experience, and develop in a professional working environment. In the short term, I aim to deliver quick and effective results while contributing positively to the company, with the long-term goal of becoming a permanent employee if given the opportunity.

TECHNICAL SKILLS

- **Software:** Autodesk Revit, Autodesk Navisworks Manage, AutoCAD, Microsoft Office, ETAP, Dialux, SIMARIS Design.
- **Electrical:** Electrical measuring devices; basic lighting design support; technical drawings interpretation.
- **Soft Skills:** Teamwork, communication, problem-solving, planning.

EDUCATION

VIETNAM NATIONAL UNIVERSITY HO CHI MINH CITY

HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY (VNUHCM - HCMUT)

Bachelor of Engineering in Electrical Engineering

| Ho Chi Minh City, Viet Nam

- **Bachelor's Thesis (In Progress):**

PROJECT

Final Year Project: 3D MEP System Modeling

| Dec, 2026

- Built a coordinated 3D MEP model (MEP scope) in Revit to support design visualization and drawing extraction.
- Created/managed families, levels, and routing; checked clashes and improved model consistency.
- Tools: Revit.

Revit Project: 3D MEP System Modeling

| Nov, 2025

- Built a coordinated 3D MEP model (MEP scope) in Revit to support design visualization and drawing extraction.
- Created/managed families, levels, and routing; checked clashes and improved model consistency.
- Tools: Revit.
- Portfolio: https://adaptable-clownfish-eb0.notion.site/TranGiaBao_ElectricalEngineer_Portfolio-2ecdd89549d3801aac22c74a8ed72e74?source=copy_link

Major Project: Electrical Design for 220/110/22 kV Substation

| Dec, 2023

- Developed the electrical design scope for a 220/110/22 kV substation as a major/specialized project.
- Prepared calculations and design documents (single-line diagram, equipment sizing/selection, protection/coordination).
- Produced technical documentation and drawings aligned with project requirements.
- Tools: AutoCAD / ETAP / Excel.

Course Project: Power Supply Design for a Mechanical Workshop

| Oct, 2023

- Designed the power distribution system for a mechanical workshop, including load estimation and feeder/cable selection.
- Built load schedule and basic design calculations to ensure safe and efficient supply.
- Compiled a project report with drawings and calculation sheets.
- Tools: Excel / AutoCAD/ MS.

Course Project: Lightning Protection Design for 110/22 kV Substation

| Jul, 2023

- Designed the lightning protection system for a 110/22 kV substation based on safety and engineering standards.
- Determined protection zones and placement of air terminals/down conductors/earthing connections; documented design rationale.
- Delivered drawings and calculation notes for the lightning protection layout.
- Tools: AutoCAD / MS/ Matlab.

WORK EXPERIENCE

Atlas Industries Ltd

Bim modeler – Electrical

| Jan, 2026 – Jun, 2026

- Developed BIM models for electrical power, lighting, emergency lighting, and fire protection systems based on client design drawings using Autodesk Revit.
- Coordinated electrical BIM models with Architectural, Structural, Mechanical, and Plumbing disciplines to identify and resolve design conflicts.
- Collaborated closely with clients, consultants to discuss technical issues, evaluate design alternatives, and agree on practical BIM solutions that met project requirements.
- Performed clash detection and multidisciplinary coordination using Autodesk Navisworks Manage, minimizing design conflicts and improving constructability.
- Utilized Autodesk BIM 360 for cloud-based model collaboration, version control, issue tracking, and coordination across project stakeholders.
- Updated BIM models to incorporate design revisions, consultant feedback, and approved coordination outcomes while maintaining model accuracy and compliance with project standards.
- Produced BIM deliverables and documentation in accordance with company standards, client requirements, and the BIM Execution Plan

Southern Power Corporation (EVNSPC)

Intern Student

| Jun, 2023 – Aug, 2023

- Looking for a electrical safety regulations, personnel organization EVN SPC.
- Automation department: Scada devices, ...
- Technical department: Drawings of transformer stations.
- Electrometer factory.
- High voltage electrical laboratory: Time regulation, electric current generating devices, voltage generating device, resistance measuring devices, circuit breaker, voltage transformer, ...

Nguyen Giang M&E

Part-time Intern

| Mar, 2022 – Sep, 2022

- Read and interpreted electrical drawings to support on-site installation activities.
- Installed cable trays, conduits, and electrical wiring systems in accordance with technical drawings and project specifications.
- Assembled, installed, and wired electrical control panels, including Emergency Transfer Switch (ETS) and power distribution panels.
- Performed cable termination, panel wiring, basic electrical testing, and troubleshooting to ensure proper system operation.
- Received, inspected, and managed construction materials, ensuring the correct quantity, quality, and timely availability for project execution.
- Complied with occupational health and safety regulations, site safety procedures, and proper use of personal protective equipment throughout construction activities.

CERTIFICATIONS & AWARDS

Certifications:	• TOEIC Listening & Reading – 610/990, ETS (IIG Vietnam)	Jun, 2026.
	• Navisworks Manage Certificate, Bim-Express Company Limited	Apr, 2026
	• Revit MEP Certificate (Excellent), HCMUT – Center Computer Engineering	Nov, 2025
	• DESL Lighting Technology, DESL	Oct, 2023
	• Microsoft Office Specialist - Word (850/1000), IIG Vietnam	Mar, 2023.
	• Microsoft Office Specialist - Excel (960/1000), IIG Vietnam	Apr, 2023.
	• Microsoft Office Specialist - PowerPoint (875/1000), IIG Vietnam	Mar, 2023.
Awards:	• Minicar Racing Contest – Finalist, 5th Place	Mar, 2021
